Redeemed Certificates

Production Device Details							
Device	Country of Origin	Energy Source	Technology	Supported	Commisioning Date	Carbon (CO ₂ / MWh)	
Balkodu I HES	Turkey	Hydro-electric	Run of river	No	2011-08-05	0.000	
Redeemed Certificates							
From Certificate ID		To Certificate ID		Number of Certificates	Offset Attributes	Period of Production	Issuer
0000-0002-2016-1173.000000		0000-0002-2016-1952.999999		780.000000	Inc	2021-01-01 - 2021-12-31	Foton

Auditor Notes

This statement is proof of the secure and unique redemption of the I-RECs stated above for the named beneficiary to be reported against consumption in the country during the reporting year stated. I-RECs are assigned to a beneficiary at redemption and cannot be further assigned to a third party. No other use of these I-RECs is valid under the I-REC Standard.

Where offset attributes are 'inc' the device registrant, who exclusively holds the environmental attribute rights, has undertaken never to release carbon offsets in association with these MWh; 'excl' means carbon offsets relating to these MWh may be traded independently at some point in the future.

For labelling scheme information please refer to the scheme's website. Labelling scheme listing may not be exhaustive.

Thermal plant emit carbon as part of the combustion process. Whilst this is not zero carbon, it is generally recognised as carbon neutral where the source is recent biomass.
